- Design UI/UX (Cesae digital)
- Curso completo em Cyber Security (Segurança da Informação)
- Angular - The Complete Guide (2025 Edition)
- React Native: Advanced Concepts

Strong skills

- JavaScript
- HTML
- CSS
- JQuery
- Design UI/UX (general)

Language

- Portuguese
- English

Bruno Santos

A dynamic and innovative 25 year old computer engineering student at the School of Technology and Management in Bragança, I am committed to pushing the boundaries of what is possible. My strong work ethic and dedication to excellence have helped me excel in both individual and team settings. I thrive on new challenges that keep me engaged and take me out of my comfort zone. My experience working in a team and front-end development skills in HTML, CSS and vanilla JavaScript and a bit of Java have honed my ability to think outside the box and deliver creative solutions to complex problems. As I enter my final year of study, I am eager to apply my knowledge and skills to real-world projects and make a meaningful impact in the field of computer engineering.

Academic Education

As I approach the completion of my degree in Computer Engineering at Escola Superior de Tecnologia e Gestão (ESTIG - IPB) in Bragança, I have gained knowledge in various technologies including React, C, C++, C#, Assembly, Java, JavaScript, HTML and CSS. These experiences have allowed me to develop a diverse skill set and a strong ability to adapt to new technologies. I am confident in my ability to apply my knowledge and skills to real-world projects and make a meaningful contribution to the field of computer engineering.

Professional Experience

Since August 2021, I have been working as a skilled Front-End Web Developer at ePharma. My expertise includes Vanilla JavaScript, HTML, CSS, and some Java. I excel in DOM manipulation, animations, AJAX requests, form validation, user authentication, etc. I have experience working with RESTful APIs and handling JSON data. I also utilize jQuery and LitElement for faster development and reusable components. I adapt quickly to new technologies and enjoy finding creative solutions to complex problems. In December 2023 I started working professionally with Angular.

Personal Projects

Since early 2024, I have been working on a personal project developing a mobile application, with plans to expand to a website, for appointment management in industries such as barbershops, beauty salons, and hairdressers. The mobile app is being developed using React Native with a Firebase backend, and the website will be built with React.js. I use Git for version control and tools like Photoshop, Illustrator, and Figma for designing the user interface and experience. This project showcases my passion for creating efficient and user-friendly digital solutions.

Goals

Driven by ambition and a strong work ethic, I am a results-oriented professional eager for new growth opportunities. My dynamic problem-solving skills and creative thinking have consistently led to success across various settings. With a commitment to personal and professional development, I am confident that my experience and skills make me a valuable asset to any organization. I am fully dedicated to achieving success and am readily available for interviews.

Strong Qualities

- Communication
- Critical Thinking
- Fast Learner
- Teamwork
- Creative

Activities

- Soccer
- Gymnasium
- Padel
